To minimise the environmental impact of our marketing materials we produce our catalogues with carbon balanced paper and print them using energy from a renewable source.

A brief introduction...

Designed and
made in the U.K.

1989 - 2026

*Celebrating 37 years of designing
and manufacturing high quality
medical equipment.*

Where it all began.

The simple Vari-Cart was the beginning of a journey starting in 1989. For 37 Years, Freeway Medical has been directly supplying high-quality medical trolleys to the NHS and the private sector at a competitive price, and this has evolved into thousands of designs and now since 2019 the very best of medical technology offerings all designed here in Thatcham, Berkshire.

With open and transparent communication channels between manufacturer and customer, Freeway Medical ensures the best with tailored designs to suit specific requirements for your needs.

Freeway Medical strives to make every detail of your experience as bespoke as the equipment solution provided. With a team of specialised experts, we guarantee you will only deal with highly knowledgeable individuals with an in-depth understanding of engineering, our products and the potential variety of a customer's requirements.

Medical monitors

Battery Powered 24" (MT700)

This model is powered by up to 3 Lithium-ion rechargeable battery packs which not only powers itself, but can also power a separate micro form PC and USB accessories. It also features the latest capacitive-type, 10 point multi-touch screen technology. Plus all the standard medical-grade features like high rated dust and moisture ingress protection.

All of our AIO/monitors are quality assured - IEC / EN 60601-1 4th edition / CE / WEEE / RoHS Compliant*
For assured safety and quality in the medical environment.

Mains Powered 24" (MT600)

For use where an iWOW has a permanent mains electricity supply close by and is to be used in conjunction with a standalone PC. It has the same medical grade features as the MT700 model as well as the same capacitive-type touch screen panel.

14th Gen Intel AIO PCs

Please visit freewaymedtech.com for more information.

AIO PC - Battery Powered 22/24" (MT500)

AIO PC - Mains Powered 24" (MT400)

With the PC built into the screen, this model does not need to have a standalone computer in the Pod or even a mains power supply, as it utilises Lithium-ion rechargeable battery packs to operate whilst completely mobile. Features the latest capacitive-type, 10 point multi-touch screen technology, plus all the standard medical-grade features like high rated dust and moisture ingress protection as standard.

For use where an iWOW has a permanent mains electricity supply close by and can remain plugged-in whilst in use. With the PC built into the screen, there's no need to have a standalone computer. It has the same medical grade features as the MT500 model as well as the same capacitive-type touch screen panel.

*More details available on request.

Quality Durability Sustainability

It's always been our focus.

We design and manufacture all of our products with two main aims - quality and product longevity.

Many components that make up our carts and trolleys are able to be easily replaced without the need for tools or engineers. As a result, our customers avoid the costly bill (both financially and environmentally) of an entire product replacement, just because a single part has failed.

Over the long run, Freeway products are almost certainly a better, more sustainable hardware choice.

Designed and
made in the U.K.

Replaceable/upgradeable - Various work surfaces that swap out in minutes, without tools.

Long life high-wear surfaces - Ultra-durable Trespa® doors and drawers ensure our carts stand up to demanding use, day in day out, for years.

Easy on, easy off - Our drawer front over-plate offers great protection in demanding environments plus the ability to add colour for easy at-a-glance consumables identification.

Thoughtful modular construction enables long life carts.

The FW3140
Vari-Cart Hybrid
demonstrates this
beautifully.

NHS Supply Chain purchasing

Do you need to purchase your equipment on the Supply Chain Framework?

It couldn't be easier to locate and purchase our carts and trolleys on the NHS Supply Chain. All you have to do is browse our website (freewaymedical.co.uk) and find the product(s) you need, then click in the NHS banner on the relevant option i.e. colour or drawer configuration. You'll then be taken directly to that product listed on the Supply Chain Framework via eDirect.

If you're purchasing multiple products, just add them one at a time to the Supply Chain basket and return to our site to locate the next. The final part of the transaction is all done on the Supply Chain website.

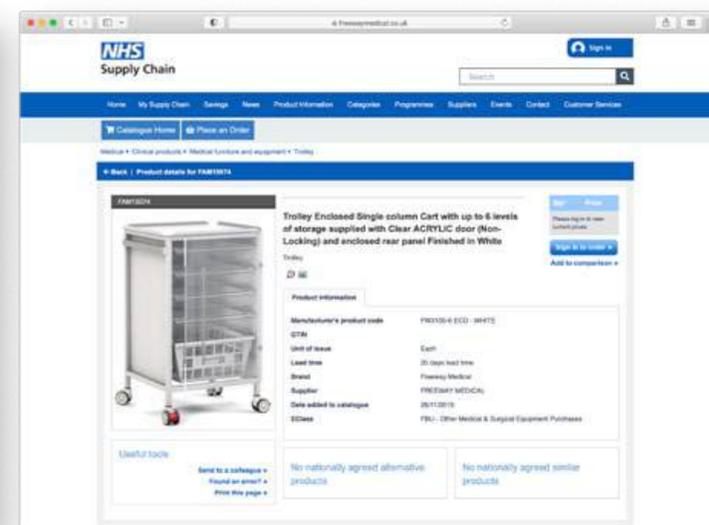

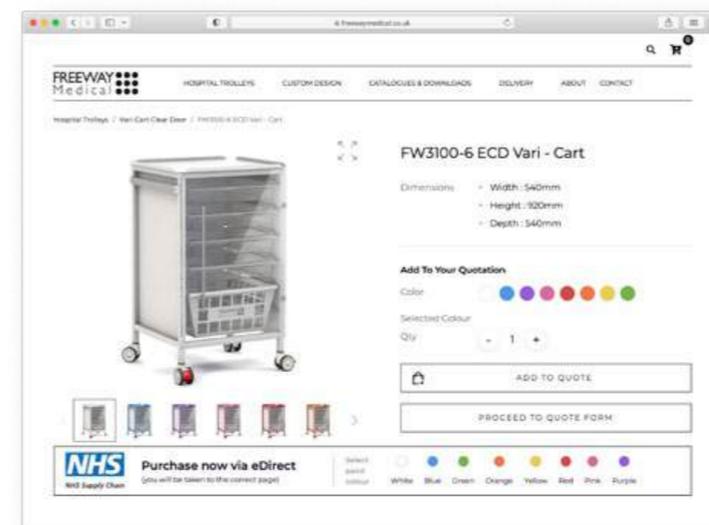

There's no need to have to search through the Supply Chain website and find our products. We've done that bit for you!

NHS Supply Chain

From finding the product to purchasing on the Supply Chain, in 5 easy steps!

- STEP 1**
 find product on freewaymedical.co.uk
- STEP 2**
 click the NHS banner
- STEP 3**
 land on NHSSC eDirect portal
- STEP 4**
 add to basket
- STEP 5**
 checkout with NHS PO No.

New 2026 ITU workstations

900 series / 1200 series / 1600 series

Chart workstation
and digital WoW
combined

All-day
performance
on a single
charge

Customisable powered digital workstations

These new carts combine a traditional chart workstation with a sophisticated mobile AC power system enabling the cart to power a PC, monitor, label printer and many other small peripherals like barcode scanners on the move. This built-in power and IT solution removes the need for a separate computer workstation saving valuable space in an already tight 'intensive treatment' area.

Varying widths, customisable storage, hook-over accessories, free colour-coding and the slide on/off chart, all help to make these workstations very adaptable and economical over time.

[See the following pages for some of its great features >](#)

900 series
(approx 900mm wide)

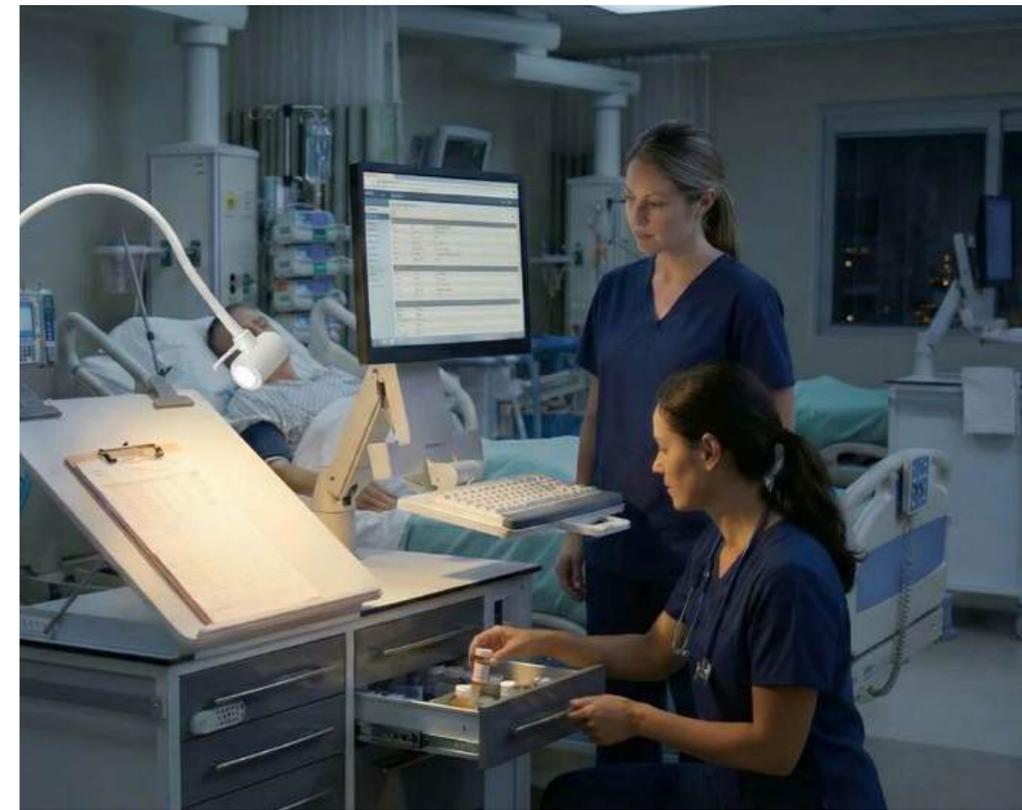

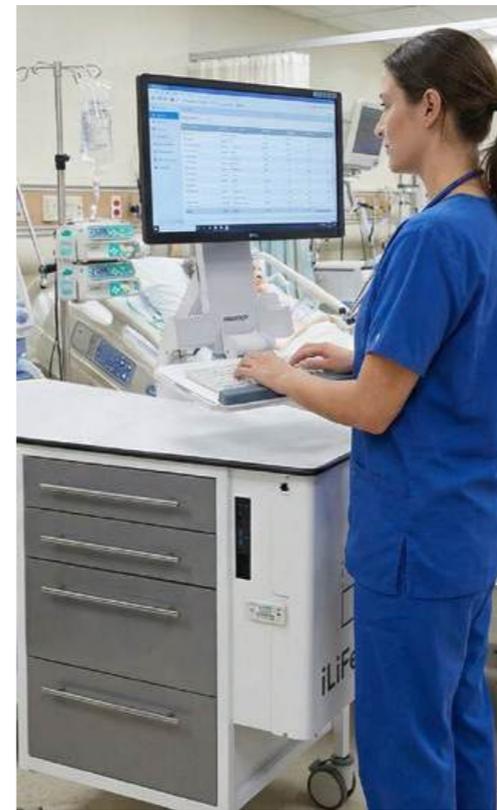

1200 series
(approx 1200mm wide)

1600 series

THE ERGO IT ARM

FRONT ELEVATION

SIDE ELEVATION

REAR ELEVATION

SIDE ELEVATION (POD)

A 30% smaller* footprint...

...compared with using two separate units.

It's certainly compact. Because it's 2 carts in 1.

By nature of the cart serving two purposes, its footprint is around 30% less than having two separate units.

Now that's easy space-saving.

Competitors offer 150W. Our powered AC is 250W!

Just a typical micro PC, monitor and label printer is already in excess of our competitors' 150W rating - $90+25+75W = 190W$

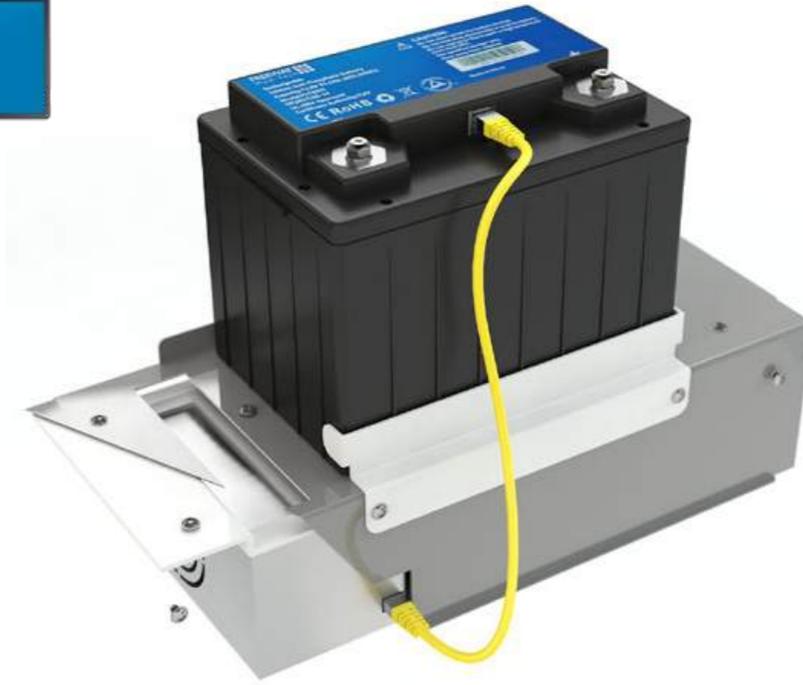

Monitor
25W

Label
printers
25-70W

5-10W

Compact PCs
80-190W

*Approximate power consumption figures. Each brand/model may vary slightly.

High off-the-floor anti-dust IT enclosure

Lockable pod options

Regular AC power sockets on the move

The enclosed IT Pod. Protect. Secure. Cool.

A high-level enclosure that effectively prevents dust ingress and build-up to avoid dangerous overheating. Equipment protected via a lockable door option.

Piece of mind PC security and cooling.

Unrestricted air flow - less dust, less fan, less energy use.

Because there is virtually no dust build-up around the inverter, there's no need for specialist cleaning or servicing of the unit. Just a simple Hoover around the grilles once in a while is all that's needed!

Anti-dust
build up

Patented
design for cool
operation

Broken sockets? Not on our watch.

Our workstations are designed with a breakaway power cord so in the event it is accidentally pulled away from its charging point, the socket isn't broken to pieces in the process!

It's simple really.

IEC-60601. No problem.

Protecting users and patients. iLiFe~AC's power inverter, battery and electrical system has been rigorously tested to comply with the strict IEC 60601 safety standards for medical devices.

And this means?

No interference with life-critical medical equipment!

24/7 hotswap power option available!

By selecting an **AIO PC or powered monitor**, users benefit from 24/7 hotswappable power and zero-downtime charging. Furthermore, the iLiFe-ready IT pod allows for easy retrofitting of a battery and inverter should an AC-powered configuration be required. **Win win.**

AC Power management made easy.

A simple on-screen widget shows how long the cart will last and its state of health.

Software license included.

EASY
ACCESS LIVE
FEEDBACK

Easy on. Easy off.

Many of our carts are built with a modular approach and therefore most major parts can be easily added, removed or replaced if damage occurs. This includes the Ergotron IT arm, which simply bolts through the worktop.

Our carts aren't out of service for long.

Find the perfect position. With the ergonomic IT arm, it's easy.

Almost infinitely adjustable, it suits users of all heights, whether seated or standing!

Perfect for shared-user workstations.

Tool-free
power cord
replacement

We listened. Power cords that are **user-replaceable**.

It may seem simple, but believe it or not, some manufacturers' carts require an engineer to swap out a damaged power cord...ours don't.

Replaced in 30 seconds - all for just the cost of a new lead!

Our 5 star, 5 year guarantee to you.

All our AC powered carts and workstations are covered by our comprehensive 5 year warranty. Parts covered include mechanics, electric lift, inverter/charger, electrical system and the battery.

Now, that's some guarantee!

9 colours. Free of charge.

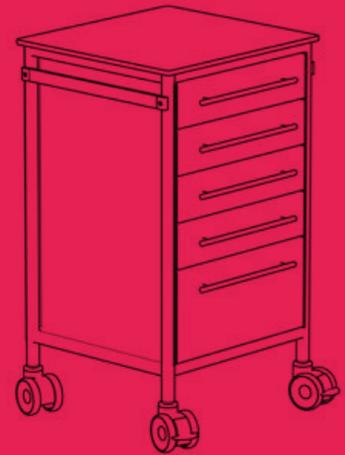

Yes, that's right. There's no extra charge to have your iLiFe AC painted in whichever colour opposite, you choose. Whether it's simply to sit better with an existing ward's decor or to denote the cart's use, the choice is yours.

All we ask, is you let us know at point of order.

Vari-Pro / Specialist

500 series
700 series
1000 series

Meet our Procedure Carts. Vari-Pro.

Utilising the same simple, yet durable construction as our Vari-Cart ranges, the Vari-Pro Procedure Carts are built to last and provide a cost-effective long-term solution.

There are plenty of upgrades to make your cart work for you even harder: upgradeable worktops, hook-over accessories, drawer-tidy dividers and digital keyless locks.

Customisation is in your hands, with plenty of options like drawer-front colours and drawer depths and combinations, all free of charge.

[Explore our Vari-Pro & Vari-Pro Specialist ranges >](#)

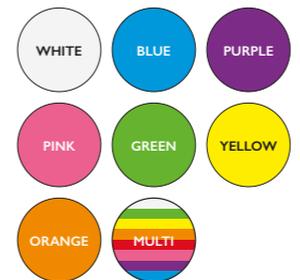

Make it your own?

The base models for our Vari-Pro Specialist Anaesthesia range have multiple options, including choosing the custom labelling, colour of drawer-fronts and drawer size combinations, which come as standard so you can customise your cart at no extra cost. If you would like to upgrade components or add optional extras, there are plenty to choose from so you can easily create the cart that suits your needs.

PRODUCT CODE
FW2190-7 ANAESTHESIA CART

Providing an integrated and streamlined workstation specially designed to suit the needs of Anaesthesia, with quick access tilt bins above the work surface and a large volume of quickly accessible drawers below the work top, that are both highly configuration to allow for customisation.

DIMENSIONS
Height = 1660mm Width = 720mm Depth = 520mm

PRODUCT ELEVATIONS (exc. accessories)

Clear tilt bins
Great for organising and providing quick access to frequently used smaller consumables.

Custom cart
Including side pull handle and drop-flap worksurface.

DRAWER LABELLING

Provides quick and reliable location of the core equipment and consumables used in emergency situations.

OPTIONAL ANTI-TAMPER SECURITY

Anti-tamper security seals available as optional equipment on our anaesthesia cart.

DURABLE TRESPA®

Solid 10mm Trespa® worksurface

HOOK-OVER ACCESSORIES (optional)

*Sharps bin not included

DROP-FLAP OPTION

ALL-METAL DRAWER CONSTRUCTION

Highly durable all-metal drawers as standard with replaceable metal drawer fronts.

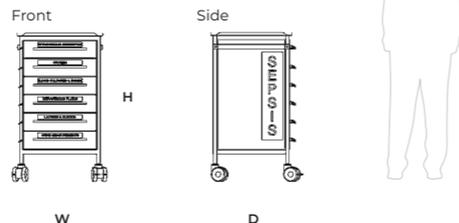

PRODUCT CODE
FW3190-6 SEPSIS (6 drawer)

The solid 6 drawers in this 500mm Specialist Sepsis cart can be clearly labelled in order to ensure clarity during a sepsis emergency.

DIMENSIONS
Height = 920mm Width = 520mm Depth = 500mm

PRODUCT ELEVATIONS (exc. accessories)

DIGITAL LOCK OPTION

Keyless everyday operation with master key for maintenance or forgotten codes.

CLEAR AND CONCISE DRAWER LABELLING SYSTEM

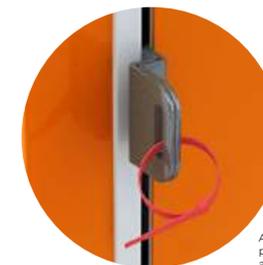

Provides quick and reliable location of equipment and consumables for the fast treatment in emergencies.

Stainless steel catches on both the frame and drawer meet neatly together.

ANTI-TAMPER SECURITY SYSTEM AS STANDARD

One-use plastic ties seal the cart and give an at-a-glance reference that the door hasn't been opened since its last re-stock. Staff can be confident that when the equipment or consumable is needed in an emergency, the trays will be fully stocked and ready to go.

A new security tie in place after stocking a cart.

HOOK-OVER ACCESSORIES (optional)

*Consumables not included.

ALL-METAL DRAWER CONSTRUCTION

Highly durable all-metal drawers as standard with replaceable metal drawer fronts.

DRAWER DIVIDER SET OPTION

Efficiently organise your smaller consumables with these easy to adjust drawer dividers.

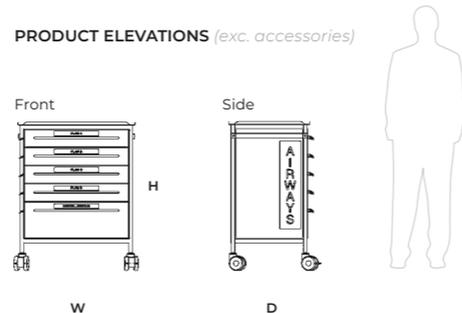

PRODUCT CODE

Vari-Lite 800

Lightweight aluminium body,
800mm wide + HTM71 trays

Meet our Vari-LITE Secure Carts.

The lightweight all-aluminium construction cart body manufactured without a frame for further weight savings provides a highly manoeuvrable platform that can be customised to suit your exact needs.

The drawers are designed to support HTM71 600x400mm format ISO plastic trays, allowing stock to be replaced quickly as the hole tray can be removed from the drawer in seconds – this is then supported by the optional colour coded “Fast Stock” HTM71 racks within our range.

ALL-METAL DRAWER CONSTRUCTION

Highly durable all-metal drawers as standard with replaceable metal drawer fronts.

HOOK-OVER ACCESSORIES (available separately)

*Consumables not included.

Medical Rails
Vari-LITE 800 is equipped with 4 x anodised aluminium rails to use with a vast range of hook-over accessories.

Manage the Vari-LITE 800 re-stocking process in a flash!

With pre-stocked trays held ready in a separate, colour matched cart, it's so easy and quick to swap used trays for new. The tall HTM71 storage units can be colour matched to your Vari-LITE 800 so the user can locate its stock without a fuss.

PRE-STOCKED TRAY
(in storage unit)

LOW / EMPTY TRAY
(from Vari-LITE 800)

Colour identifiable HTM71 storage units - fully stocked trays are held here ready for quick re-stocking of an Vari-LITE 800 matching its colour.

Colour coded back-room storage.

By each Vari-LITE 800 having it's own corresponding colour storage unit, the whole process of re-stocking in different departments is easy and better logged.

Freeway HTM71 - a colour-coded organised re-stocking system.

Another way to use the HTM71 system, is to keep pre-stock trays in the 'green' area of the tall storage and put empty trays back into the 'red' area. This simple, effective stock storage system can be utilised with the Vari-LITE 800 cart.

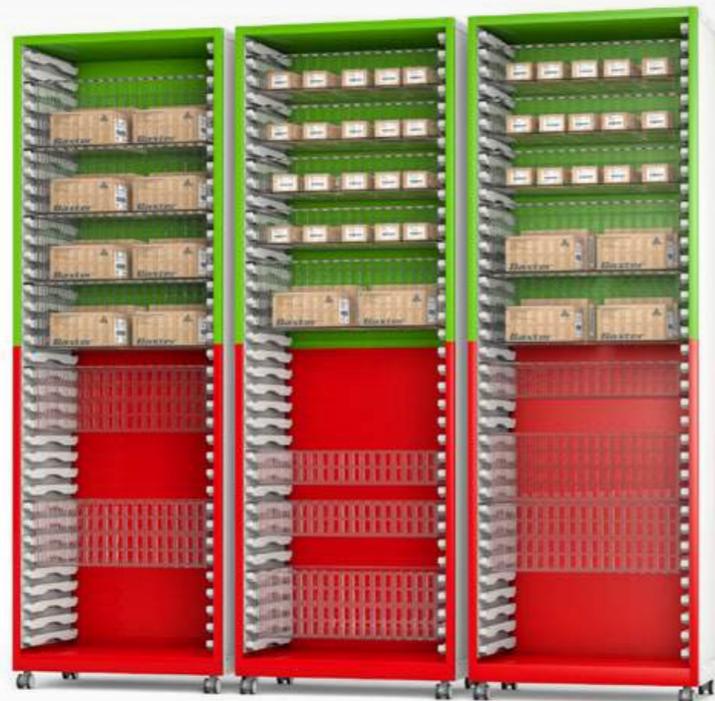

HTM71 trays (Health Technical Memorandum 71)

Published by the NHS, the HTM71 standard is a consistent sized storage solution for trays, baskets and cupboards which all accept these standardised 600x400mm trays.

GREEN AREA
= STOCKED TRAYS

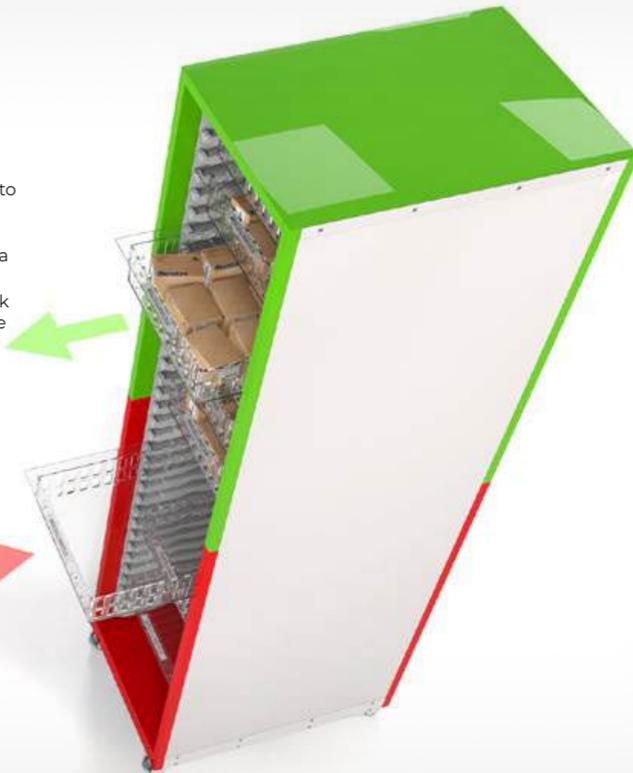

RED AREA
= EMPTY TRAYS

FastStock^{HTM71}
by Freeway Medical

Create unparalleled speed and organisation when re-stocking carts

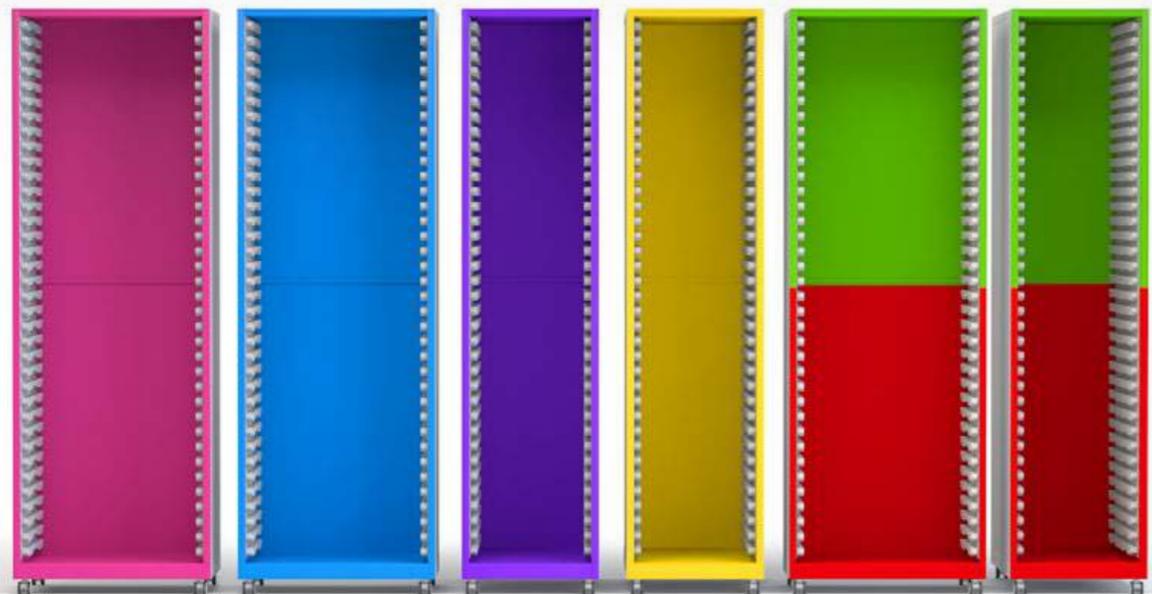

- Empty tray out and put into the red area
- A new, fully stocked tray pulled from the green area and put into the Vari-LITE
- Back-room staff then stock the empty trays and rotate into the green area of the tall storage unit.

1. Choose the HTM71 cabinet style
Available in both Vari-Flow or FastStock variants. FastStock cabinets are always painted green and red to denote stocked and empty trays.

2. Choose the width and qty of cabinets to suit your space
Available in two widths - the HTM71 trays are rotated 90° when stored in the narrow cabinet.

3. Choose the colour*
The Vari-Flow cabinets are available in a choice of 8 paint colours. FREE OF CHARGE.

Standard - wide
660x465x1950mm
(WxDxH)

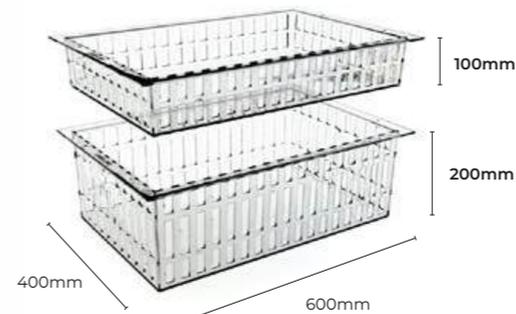

Standard - narrow
465x660x1950mm
(WxDxH)

FastStock - wide
660x465x1950mm
(WxDxH)

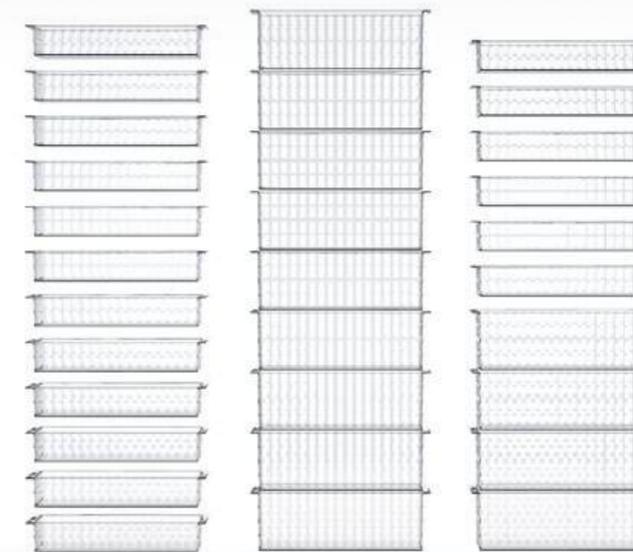

FastStock - narrow
465x660x1950mm
(WxDxH)

*FastStock versions excluded.

4. Need trays?
100mm or 200mm clear HTM71 trays are available if required and can be purchased as sets of the same size or a custom mix of both the two heights, whatever suits the purpose.

See overleaf for cabinets/tray order codes

Vari-Cart

500 series / 1000 series

It's all in the name. Vari-Cart.

A varied-use, staple cart for every hospital ward. From its simple construction through to its durable finish, our Vari-Cart range with upgradeable security options, is fit for purpose in even the most challenging working environments.

Tool-less parts and maintenance further extend the product life without expensive bills for replacement carts. The choice from 8 frame colours, together with tray choice and combination, come as standard on all models.

[Explore our Vari-Cart range >](#)

VARI-CART: SIMPLE MODULAR CONSTRUCTION

The Vari-Cart has been designed to make your life simple. Whether routine deep-cleaning or replacing a damaged part, the Vari-Cart's construction makes it simple. To disassemble the cart, just remove 4 thumbscrews – no tools, no hassle.

VARI-CART OPEN - 500 SERIES / 5 TRAY SPACE

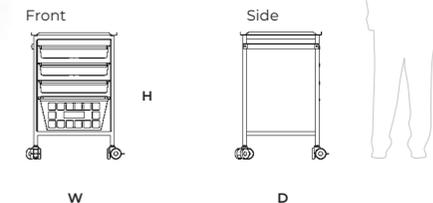

PRODUCT CODE
FW3100-5 Open Vari-Cart 500 Series

A 5 tray capacity on this Open Vari-Cart offers useful storage and can be customised too. Try adding a splash of colour for your frame to make it really look the part. This model, alongside the rest of our range, is available in a selection of 8 durable and easy-to-clean colours at no extra cost.

Dressing Carts

500 series
700 series
1000 series

Simple Dressing Carts. Built to last.

Choose from a nylon coated mild steel frame or go for a full stainless steel option, each available with 2 or 3 worksurfaces and in 3 widths.

To complement our original 'capped' range of dressing carts, we now also offer a raised-lip worksurface model with the same frame, same shelf and the same width options.

Built to stand the test of time and fitted with our triple-bearing 75mm castors, these Dressing Carts are a great choice for any hospital's forward-thinking equipment budget.

Infusion Pump Stands

STANDARD / STAINLESS
2 HOOK / 4 HOOK

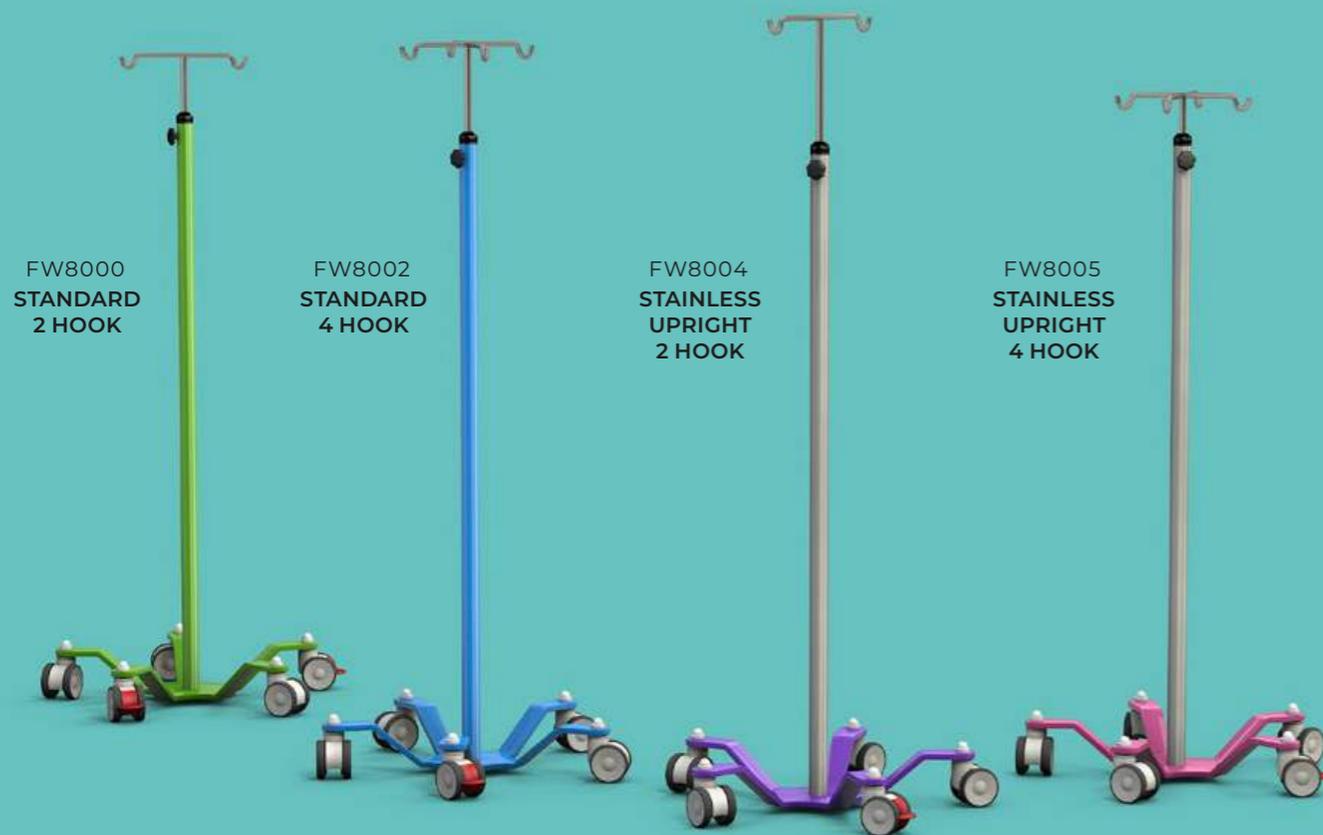

Durable. Reliable. Steady.

Constructed from heavy-duty steel and optional stainless steel, our Infusion Pump Stands are extremely durable, easy to clean and very safe due to their low centre of gravity 5-leg base.

The 5 high quality triple-bearing castors incorporate 2 brakes to ensure the stand always stays put!

[Explore our Infusion Pump Stand range >](#)

What is included on the base models?

Once you have chosen your desired Infusion Pump Stand model, choose the colour of the base at no extra cost to have a spark of colour.

If you opt for the mild steel upright, you can also choose from 8 available colours to paint your stand in. Our durable nylon powder coat paint system is resistant to knocks and scrapes.

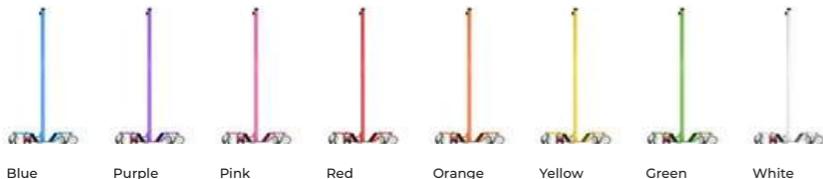

- **Topple resistant, low centre-of-gravity base**
- **Adjustable IV pole height**
- **5 ultra durable castors with 2 brakes**
- **2 or 4 hook IV pole options**
- **Nylon coated steel or stainless steel upright options**

INFUSION PUMP STAND - 2 HOOK

BASE/UPRIGHT COLOURS *(included in price)*

PRODUCT CODE

FW8000 Infusion Pump Stand (2 hook)

Safety and stability are paramount on Infusion Pump Stands which is why our stands have been designed to have an ultra-low centre of gravity with our 5-point base. Have confidence your IV poles are stable upright and topple resistant.

Accessories

HOOK-OVER
DRAWERS
TRAYS

Expanding your cart's use with accessories.

From hook-over attachments and replacement drawer fronts to storage trays and divider sets. Easily maintain or adapt a cart's purpose by adding accessories to suit the environment it's in.

With a comprehensive set of accessory parts available that simply hook-over or clamp on without the need for tools, a cart can be repurposed in minutes!

[Explore our Accessory range >](#)

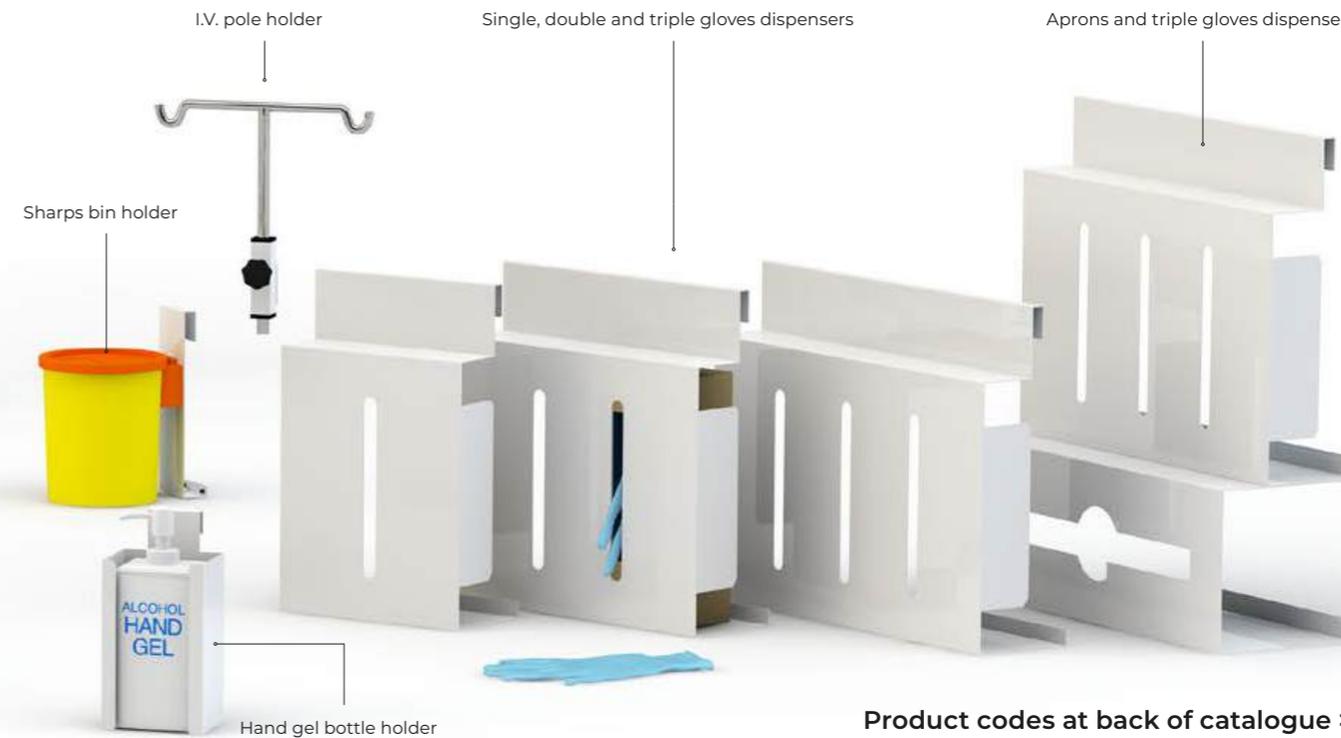

Hook-over accessories

See the range, just 'hanging' out.

These simple, but very useful, collection of hook-over accessory products will greatly expand the use of any of our carts. Their quick-on and quick-off ability give you ultimate flexibility on how and when you use them!

Hook-over accessories

Product codes at back of catalogue >

Digital lock

Easily secure drawers and cupboards digitally.

Either to secure sensitive stock or protect a patient's valuables, our keyless operation digital lock provides security with a simple 4-digit user-defined PIN code. The device is powered by 2 x AA batteries.

An override key. Just in case...

Although keyless in operation, we supply a backup override key in case of forgotten PIN numbers!

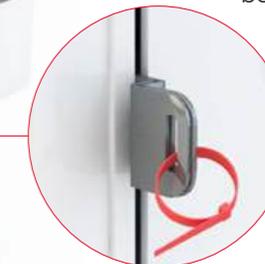

The digital lock fitted to a metal drawer

Anti-tamper security

Rest easy that in an emergency, your cart will be fully stocked, ready and waiting.

Available as standard on some of our products, this simple yet effective anti-tamper system can be added to other products in our range to monitor whether drawers, doors and cupboards have been opened since their last re-stock.

Emergency situations call for a speedy response - therefore pulling open a drawer to find the item you need is missing, is a complete disaster!

By replacing the anti-tamper seal ONLY when the cart has been fully stocked, you can be assured at a glance, the equipment inside hasn't been used, moved or even in some cases, stolen!

Speak to our sales team for more information.

Drop-flap worksurface

Need a little extra work space?

Our drop-flap accessory offers an extra worktop with the advantage that it can be easily dropped down out of the way to reduce the cart's footprint when not in use. Available in either left or right handed options for use on selected carts.

Freeway medical rail

Medical Rail - the foundation to our hook-over accessories range.

The medical rail offers the ability to transform the cart's usage, depending on what hook-over accessories you choose. From hand gel, O2 bottle and apron holders to IV pole holders and sharps bin attachments, Freeway Medical have many accessories to choose from.

See overleaf for the range of accessories >

DELIVERY/DISCLAIMERS

DELIVERY

We pride ourselves on delivering high quality, whether it be the actual products themselves or simply the way they turn up to our customers. Everything leaves our factory consistently well protected and packaged in order to ensure a faultless delivery time after time.

Schedules are rigorously adhered to in order to avoid any unnecessary inconvenience, or potential costly delays to installation on site.

The majority of our products come fully assembled and once any protective transit packaging has been removed, can go into service immediately.

DISCLAIMERS

Imagery and colours shown in this catalogue are representative and may differ slightly from the actual product received.

Measurements are correct at the time of printing, but are subject to change without prior notice. Always consult the sales team via sales@freewaymedical.co.uk if you require exact, up to date information for a product and they will provide the latest data available.

GENERAL PRODUCT CLEANING INFORMATION

SUITABLE CLEANING CHEMICALS

Given the vast range of cleaning products on the market, it is not possible to list all acceptable brands. We can however, confirm that our products are compatible with cleaning products containing the following chemicals or are from popular cleaning brands. Should you require confirmation of suitable products that are not listed, please contact us with the relevant product data sheet and we will confirm suitability with our in-house specialist.

CLEANING PROCEDURE FOR NYLON MODIFIED POLYESTER COATED SURFACES:

- Painted surfaces should be cleaned using a soft damp non abrasive cloth and polished dry
- Continual exposure to wet conditions is likely to result in rusting/or the paint lifting.
ALWAYS DRY THE SURFACE AFTER CLEANING.
- Continual use of cleaning products may result in a dulling of the surface.
- Do not use solvents, bleach, abrasives, synthetic detergents, wax polishes or aerosol sprays unless otherwise listed in the above list.

*Solutions must always be diluted in accordance the with manufacturer's instructions for use on medical products/furniture.

*The application of the cleaning solution must be in accordance the with manufacturer's instructions for use on medical products/furniture.
