AN INTRODUCTION

An Intelligent Workstation on Wheels - iWOW®

From decades of product development at our sister company Freeway Medical, Freeway Med-Tech now brings cutting edge technology to the portfolio.

Using the same methodical approach to design, manufacture and delivery, our new range of mobile iWOW® workstations are proving to be very popular indeed.

With lots of features, options and customisable solutions available, the Freeway Med-Tech iWOW® range has to be seen to be believed. And what's even more impressive, is how competitively they're priced. You'll be surprised!

Familiarise yourself with iWOW® and its technologies >

WHAT MAKES AN iWOW®

A great product is the sum of its parts.

Each area of our iWOW® is designed to not only outperform its competitors, but to outlast them as well. This makes for an extremely cost effective way to incorporate mobile IT into your hospital.

Familiarise yourself with each of the separate high quality components that make up an iWOW®. A standard iWOW® is used here to demonstrate.

Premium triple bearing castors

Anti-topple safety base

IT Monitor Pole

IT Pod

Coiled power/charging lead

Trespa®
Worksurface

Medical Grade
Monitor or AIO PC

Height adjusting
Gas Lift

Note - An electronic digital lift for height adjustment is standard equipment on iWOW Plus.

Available as an option on other models.

THE POD

At the centre of all our iWOWs.

Sturdy, easy to clean and secure. The iWOW® Pod is at the core of all the models and houses power connections, transformers, wiring and even a micro PC on the iWOW® DC model (pictured here).

Made from aluminium and coated in nylon modified polyester, the Pod is easy to keep clean using common anti-bacterial chemicals and it's contents are kept secure with a lock and key. Integrated vents ensure any electrical equipment doesn't overheat.

Lockable door - conceals all power and IT equipment including loose wiring/ cables away from dirt and dust.

Charging/power cable - with a reach of approx. 3.5m, the brightly coloured coiled cable ensures the iWOW is never far away from a point to charge or power the cart. Fitted with a pre-wired plug.

Pre-wired UK 3-pin safety plug

Cabling entry/exit - all cabling exits neatly out from the top of the Pod, through the worksurface and IT Pole.

Pod rear - constructed from nylon coated aluminium, the main body of the Pod keeps everything protected and secure.

IT, power and wiring - all electronics are housed here, including transformer, cables, Thin Client PC and additional plug sockets (depending on model).

Security - a cam lock and key ensures the Pod contents are kept safe and secure.

Ventilation - laser cut vents remove any unwanted heat build-up within the Pod.

Power the PC on/off without needing to unlock the Pod.

The base of the iWOW Pod, has a convenient cutout in the metalwork to allow for quick access to the PC power button and other ports like audio and USB.

THE iWOW® MONITOR POLE

Beautifully simple.

By avoiding the need for many complicated moving or adjustable parts, the IT Pole is a reliable component in the make up of our iWOWs. Easy side-to-side rotation and up-and-down tilting allow the screen to be viewed from an endless array of angles and positions.

Easy tilt adjustment - vertical angle changes of the monitor/VESA mount are handled by a quick-release clamp system.

A solid foundation - neatly housing untidy cabling from PC to monitor, the main tube is manufactured from extruded aluminium which is anodised and nylon coated for added protection. No more wobbly screens!

VESA monitor mount - the IT Pole uses an industry standard 100x100 VESA mounting system.

Effortless monitor rotation - achieved by the precision milled solid aluminium cuff. This process/ component further reduces screen wobble.

Choose a colour - part of the colour-coded parts pack on our iWOWs, the IT Pole upright is available in 8 bold colours.

Neat and tidy cabling

The integral cable routing through the main tube ensures the worksurface remains less cluttered and easier to clean.

It's a win win.

GAS HEIGHT ADJUSTMENT

Squeeze to go higher.

Standard equipment on iWOW® and iWOW® Keyboard, the lever-operated gas lift enables quick and easy height adjustment. All the heavy lifting is done for you on the way up and just a gentle amount of pressure is needed to lower the worksurface.

Maximum vertical travel:

395mm

*Diagrams shown here:
iWOW Keyboard.

ALL-ELECTRIC LIFT

On iWOW® Plus, it's all electric.

With the extra weight of storage drawers and rail-mounted accessories, on iWOW® Plus the height adjustment is handled seamlessly by a touch button electric lift system. Easy, eh?

Digital height display - the up/down lever shows the floor-to-worktop distance when raising or lowering the cart (in cm).

THE ANTI-TOPPLE SAFETY BASE

In a busy healthcare environment, we appreciate it can get quite manic. So accidents with equipment are really not wanted.

The 'Heavyweight' - constructed from solid steel and nylon coated for protection, the iWOW base helps keep everything planted to the floor whilst moving the cart is smooth and precise.

Bumpers - built-in protection from those harsh collisions with doors, corridors and furniture.

Ultra low centre of gravity - the deep drop from the top of the castor mounts gives our iWOW base it's 'anti-topple' safety characteristic. Simple, but very effective!

ULTRA DURABLE CASTORS

Using the highest quality components to ensure the smoothest possible movement of our iWOWs.

Large wheels - utilising 100mm diameter wheels reduces vibration and makes going over general lumps and bumps a lot easier compared with a smaller wheel.

Great tyres. Great ride - these soft, grippy and durable tyres are the iWOW's only point of contact with the floor, which is why they are made using the very best high performance material.

Bump protection
4 bumpers included on all iWOWs.

Silky smooth operation
The iWOW's premium castor uses a triple bearing setup so side-to-side movement is as smooth as spinning the wheels.

High performance brakes
Our iWOW's feature 2 castors with integral foot brakes to ensure the cart doesn't stray across a corridor or ward accidentally!

TRESPA® WORKSURFACES

Incredibly tough. No compromises.

A high performance, ultra durable material suited perfectly to the medical environment due to being able to withstand aggressive chemical cleaning week-in, week-out.

The material is so rigid we can comfortably produce worktops with large overhangs and machined handles close to the edge, without any fear of weakness or damage occurring whilst in use.

Material thickness:
10mm

Soft radius corners - because of the material's solid construction, it allows us to machine cut the corners with beautiful rounded edges and corners to remove any 'sharp' contact points.

Extremely rigid - even at only 10mm thick, Trespa® remains incredibly strong allowing us to use it on relatively narrow worksurfaces without any structural issues.

ADJUSTABLE SHELF / WRIST SUPPORT

Ergonomically designed for standing use and users of all different heights.

We've designed our pull-out keyboard shelf to tilt away from the user which greatly reduces the strain on the wrists, helping to reduce the risk of repetitive strain injuries. Especially helpful for taller operatives.

Negative tilt amount:
10°

Left handed. Right handed. It doesn't matter.

Simply push the soft rubber wrist support to the desired side until it clicks into place. Simple, eh?

FREEWAY
Med-Tech

DRAWERS, TRAYS AND DIVIDERS

Trays for speedy re-stocking.

Available in a variety of depths, our removable clear tray system ensures quick transfer/replacement whilst being easy to clean when separated from the drawer.

Durable, all-metal drawers.

All drawers from our iWOW® Plus and Fixed models are constructed from nylon-coated mild steel and have a detachable face plate which make replacing damaged drawer fronts a simple, end-user operation.

DURABLE COATINGS

Colour. Protection. Long life.

All of our mild steel components and tubing are nylon coated to give a long lasting durable finish. Certain parts are also colour-coded using one of eight vibrant hues so you can match your equipment to a ward or specific treatment areas.

Disinfection made easy

Our nylon coating is able to withstand regular cleaning with alcohol wipes and common industry cleaning products*.

Choose a colour

At no extra cost, you can choose to colour-code your family of iWOWs!

*Refer to pages 154/55 for more details on suitable chemicals/products.

LOOKING FOR SOME COLOUR?

Take your pick.

Go bold or go traditional: the choice is yours and is included as standard on all of our products.

From aqua and lime to pink to orange, any of our equipment can be personalised at your request. Colour coding is a popular way to distinguish which equipment belongs to each ward, so if it is moved, it is instantly recognisable.

All colours are durable so whatever you choose is guaranteed to last.

EASY CHARGING

Just one plug.

Charging your iWOW® couldn't be simpler. Just unhook the high visibility power lead from underneath the worksurface and plug into a regular 240V mains socket. Easy, eh?

Long-reach flexi cable

All iWOW® models feature a coiled power lead with approx. 3.5m of reach. Note this can be used for a permanent power supply if a mains monitor is opted for.

CUSTOM
LENGTHS
AVAILABLE

CHARGER DOCK

Convenient off-cart battery charging

For true non-stop performance, fresh batteries can be charged off-cart ready to swap out in a matter of seconds! This enables the iWOW® to stay completely off grid and independent from fixed location mains power sockets.

Note - Charging dock(s) are available separately.

Long-life battery technology

The AIO DC Powered Monitor/PC uses Freeway Med-Tech 202 Li-ion rechargeable batteries. Rated at DC10.9V 7800mAh - 85Wh.

STANDARD ACCESSORIES

A hook-over system for the Plus and Fixed iWOWs.

Transform your cart by adding a number of accessory modules to the medical rails that come pre-installed on our Plus and Fixed iWOW models.

The addition of a sharps bin or alcohol gel holder really does make the iWOW a more complete workstation on wheels!

There's plenty to choose from

See pages overleaf for our standard hook-over range.

CUSTOM ACCESSORIES

We're happy to design bespoke accessory solutions. Just ask!

The standard iWOW and iWOW Keyboard do not feature pre-installed medical rails, but that doesn't mean they can't feature important accessories if your requirement dictates this.

See examples to the right of bespoke accessories and attachments.

Avoid roll-out delays with pre-installed equipment

We will pre-install hand-held printers and/or similar medical equipment, even if the customer supplies the product. Anecdotally, it saves time and potential errors!

STANDARD ACCESSORIES - iWOW® PLUS / FIXED

Transform an iWOW® Plus or iWOW® Fixed by adding accessories!

IMAGE	PRODUCT CODE	PRODUCT NAME	DESCRIPTION	DIMENSIONS (HXWXD)
1	FW9056	Clinell wipes dispenser	Holds 1 pack of Clinell anti-bacterial wipes	180x260x110mm

10	FW9050B	Twin glove dispenser	Hook-over dispenser which holds 2 separate glove packs	330x255x90mm
11	FW9050	Triple glove dispenser	Hook-over dispenser which holds 3 separate glove packs	330x375x90mm
12	FW9051	Apron roll dispenser	Holds a single apron roll (max dia. 145mm)	215x375x160mm

The pre-installed medical rails on all iWOW Plus and Fixed carts.

MEDICAL MONITOR OPTIONS

Freeway Med-Tech Battery Powered Medical Monitor

This model is powered by up to 3 Lithium-ion rechargeable battery packs which not only powers itself, but can also power a separate micro form PC and USB accessories. It also features the latest capacitive-type, 10 point multi-touch screen technology. Plus all the standard medical-grade features like high rated dust and moisture ingress protection.

INDUSTRY LEADING TECHNOLOGY!

Our MT700 monitor will power a micro PC processor at full speed!

100% CPU speeds!

NHS Supply Chain

Freeway Med-Tech Mains Powered Medical Monitor

For use where an iVOW has a permanent mains electricity supply close by and is to be used in conjunction with a standalone PC (separately powered). It has the same medical grade features as the MT700 model as well as the same capacitive-type touch screen panel.

All of our AIO/monitors are quality assured -

IEC / EN 60601-1 4th edition / CE / WEEE / RoHS Compliant*

For assured safety and quality in the medical environment.

*More details available on request.

MEDICAL AIO OPTIONS

Freeway Med-Tech all-in-one (AIO) Battery Powered Medical PC

With the PC built into the screen, this model does not need to have a standalone computer in the Pod or even a mains power supply, as it utilises Lithium-ion rechargeable battery packs to operate whilst completely mobile. Features the latest capacitive-type, 10 point multi-touch screen technology, plus all the standard medical-grade features like high rated dust and moisture ingress protection as standard. New 22" model now available.

Freeway Med-Tech all-in-one (AIO) Mains Powered Medical PC

For use where an iVOW has a permanent mains electricity supply close by and can remain plugged-in whilst in use. With the PC built into the screen, there's no need to have a standalone computer. It has the same medical grade features as the MT500 model as well as the same capacitive-type touch screen panel.

UL-60601 CERTIFIED - All Freeway Med-Tech AIO and monitors are UL-60601 Certified. This means they are safe for near-patient use and will not interfere with other life critical medical equipment. The monitors do not emit RF (radio frequencies) or EMI (electro-magnetic interference) and nor will they be affected by it.

WHY BUY FREEWAY? BECAUSE ALL OF THESE FEATURES ARE STANDARD!

Mobile power + DC out

Our powered monitor and AIO feature DC power out which means they can run a micro-form PC or peripherals and stay mobile for an entire shift.

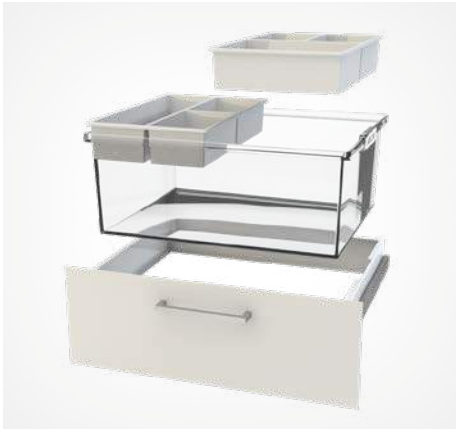

An ultra smooth ride

Large triple bearing castors provide effortless manouverability and the super soft tyres grip the floor in all conditions. Easy-use foot brakes ensure the iWOW® stays where it was put.

Digital electric lift

All height adjustable models have an electric lift option which is programmable for different user heights and features a digital display showing the exact height of the worktop to the floor.

Clever storage options

The generic metal drawer with clear tray inset offers great re-stocking and cleaning opportunities by nature of the tray being easily removed. For organisation, a set of sliding divider trays hang at the top of the tray.

Concealed cables

Safety and cleaning are improved by having all loose cabling routed through the IT Monitor Pole from monitor to PC and vice versa. Mouse and keyboard cables also enter the pole via their own dedicated cutout.

Customisable

A service which is quite unique to Freeway, is customisation. We endeavour to deliver products that satisfy the customer's needs, even if that includes fabricating bespoke components and solutions.

iWOW
INTELLIGENT WORKSTATION ON WHEELS

THE iWOW® COLLECTION

An iWOW® for every purpose.

The ever-expanding iWOW® line-up caters for both budget and application needs. From the original iWOW® through to the brand new tablet docking Duo, each model features an industry-leading 24in battery powered monitor or AIO PC.

iWOW® Height adjustable with integrated worksurface.

iWOW® Keyboard Height adjustable featuring an integrated pull-out keyboard shelf with configurable L/R wrist support and negative keyboard tilt function.

iWOW® Plus Height adjustable with integrated storage, keyboard shelf and optional accessory system.

iWOW® Fixed Fixed-height cart in two widths with high capacity integral storage drawer and tray system.

iWOW® Duo Brand new tablet docking height adjustable cart with integrated pull-out keyboard shelf.

iWOW®

GAS LIFT / ELECTRIC LIFT

The original iWOW® is a compact mobile workstation which lends itself to dedicated tasks such as logging patient data and drug administration. Available with gas height adjustment or a programmable digital electric lift.

iWOW® - WITH GAS LIFT

POD/BASE COLOURS *(included in price)*

Blue Purple Pink Red Orange Yellow Green White

PRODUCT CODE iWOW® with Gas Lift

Our standard 'intelligent workstation on wheels' features a durable, anti-tilt base upon an ultra smooth set of castors (2 brakes). Generous bumpers help alleviate damage from knocks to doors and furniture. With nearly 400mm of travel, the height adjustable post allows users of all heights to work safely and comfortably. Featured on all iWOW®s, the lockable IT Pod houses cables, transformers and a micro form PC (if utilising the popular MT700-24T monitor). Fitted with a manually operated gas lift and 3.5m charging lead.

DIMENSIONS

Height = 750-1145mm* Width = 600mm Depth = 510mm

ANTI-TILT BASE & PREMIUM CASTORS

Low centre of gravity base and long-life triple bearing castors

iWOW® PLUS - INTEGRATED STORAGE AND KEYBOARD SHELF

iWOW-PLUS by FREEWAY Med-Tech

Packed with 'PLUS' features as standard!

- All-metal storage drawers with replaceable front panels
- Choice of drawer/tray combinations and sizes
- Integrated keyboard and mouse shelf with ergonomic 10° negative-tilt
- Left or right hand adjustable wrist support
- Ergonomic 10° negative-tilt keyboard/mouse shelf
- Digital electric lift
- Medical rails for hook-over accessory system
- The same durable Trespa® worksurface with integrated handles, as all iWOW® models

HOOK-OVER ACCESSORIES *(available separately)*

(p.24-27)

*Consumables not included.

LOCKABLE IT POD

(p.8-9)

The key operated lock is standard on all iWOW® IT Pods.

BATTERY POWER MONITOR INCLUDED

MT700-24T

(p.74-85)

MICRO FORM PC-READY

Install a micro form PC client into the iWOW® IT Pod.

*PC not included.

DIGITAL ELECTRIC LIFT *(as standard)*

(p.13)

Standard equipment on iWOW-Plus, all height adjustment is handled by a programmable electric lever.

Configurable. Adaptable. Easy clean storage.

iWOW Plus is available with a number of different drawer and tray combinations to suit your purpose.

The options are vast - you can choose between; 2 drawers, 3 drawers, 4 drawers, 2 drawers and an extra deep tray, 3 drawers and a medium depth tray.....the list goes on!

We also include handy inset divider trays which can be slid left and right or even removed completely to the more bulky stock in the tray underneath.

Sliding organiser trays - practical lift-out divider trays in 4 different compartment styles.

Clear removable drawer trays - 4 different depths, convenient storage trays for easy cleaning with integral labelling.

All-metal soft-close drawer - a generic chassis with removable faceplate and handle for cost-effective maintenance/repair.

iWOW-PLUS STORAGE CHOICE

4-drawer
4 single height drawers with trays

2-drawer
2 double-height drawers with trays.

3-drawer
2 single height drawers and trays at the top, 1 double-height drawer and tray at the bottom.

3-drawer
1 double-height drawer and tray at the top, 2 single height drawers and trays below.

3-drawer / triple depth tray
2 single height drawers and trays at the top, 1 double-height drawer with a triple height tray (approx 240mm) at the bottom.

3-drawer / quad depth tray
2 single height drawers and trays at the top, 1 double-height drawer with a quad height tray (approx 320mm) at the bottom.

A tray to suit every purpose

The iWOW® Plus' inner-drawer clear storage trays are available in 4 different sizes. All dimensions are consistent apart from each tray's height. They all feature the same profile around the top edge which hold the sliding organiser trays and can be kept clean with alcohol wipes.

Length: 425mm
Width: 310mm
Height: 80/160/230/300mm

iWOW-PLUS

iWOW-FIXED⁶⁰⁰

For objects of all shapes and sizes

The iWOW® Plus' sliding divider trays are available in 5 different variants. All dimensions are consistent for each tray. Again, they are very easy to keep clean by simply wiping over with standard alcohol wipes or similar cleaning solutions.

Length: 286mm
Width: 200mm
Height: 80mm

iWOW-PLUS

iWOW-FIXED⁶⁰⁰

For those wanting 'keyless' security.

Easy day-to-day PIN operation.

Secure sensitive stock with our keyless operation digital lock. It provides security with a simple 4-digit user-defined PIN code. The device is powered by 2 x AA batteries.

A forgotten code? - there's always a master key to override the digital lock and reset it in the event of forgotten or lost PINs.

Does my security choice affect the cost?

Both our digital keyless and Abloy® keyed security choices are no-cost options and included in the base cost of our iWOW Plus workstations.

Or, if you prefer keys then the Abloy® cylinder lock is the one for you.

True anti-bump protection.

The ABLOY® cylinder uses a rotating disc principle and is therefore immune to the practice of "bumping". This technique involves the manipulation of the pins inside the lock and, as ABLOY® cylinders do not use pins, this technique is totally ineffective.

Millions of combinations

Almost limitless master keying and lock combinations are possible with the Abloy® lock.

Attractive - chrome plated finish fits perfectly with other high quality components on the iWOW® Plus workstation.

iWOW® FIXED 600

FIXED-HEIGHT, 600MM WIDE

The newest in the line-up and now available in two different widths, iWOW® Fixed offers storage a plenty with the iWOW® drawer/tray system plus up to four medical rails for hook-over accessories. All this on a fixed height chassis.

iWOW® FIXED 600 - XL STORAGE / FIXED-HEIGHT / 600MM WIDE

WORKTOP
FIXED
HEIGHT

MEDICAL
RAIL
AS STANDARD

PRODUCT CODE
iWOW® FIXED 600

For those not needing height adjustment, this fixed-height model has an abundance of storage space utilising the same drawer/tray system as iWOW® Plus. It also features up to four medical accessory rails which can hold accessories like Sharps bins, gel holders, O₂ holders, notes folders, to name but a few (see pages 26-29). As other models, cables, power supplies and a micro PC can all be safely housed in the integrated iWOW® IT Pod (see pages 10-11).

PRODUCT CODE
iWOW® FIXED 800

For those needing maximum storage, this fixed-height 800 model has an abundance of storage, utilising the HTM71 600x400mm tray system. These hospital standard trays can be swapped out quickly and easily with new stocked trays from modular storage racks which support the HTM71 system (see pages 64-67). As per other iWOW® models; all cables, power supplies and a micro PC can be safely housed in the integrated iWOW® IT Pod (see pages 10-11).

(p. 24-27)

*Consumables not included.

Manage the iWOW® Fixed 800 re-stocking process in a flash!

With pre-stocked trays held ready in a separate, colour matched cart, it's so easy and quick to swap used trays for new. The tall HTM71 storage units can be colour matched to your iWOW® Fixed 800 so the user can locate its stock without a fuss.

PRE-STOCKED TRAY
(in storage unit)

LOW / EMPTY TRAY
(from iWOW Fixed 800)

Colour identifiable HTM71 storage units - fully stocked trays are held here ready for quick re-stocking of an iWOW® Fixed 800 matching its colour.

Colour coded back-room storage.

By each iWOW having its own corresponding colour storage unit, the whole process of re-stocking in different departments is easy and better logged.

Freeway HTM71 - a colour-coded organised re-stocking system.

Another way to use the HTM71 system, is to keep pre-stock trays in the 'green' area of the tall storage and put empty trays back into the 'red' area. This simple, effective stock storage system can be utilised with the iWOW® 800 cart.

GREEN AREA
=
STOCKED TRAYS

RED AREA
=
EMPTY TRAYS

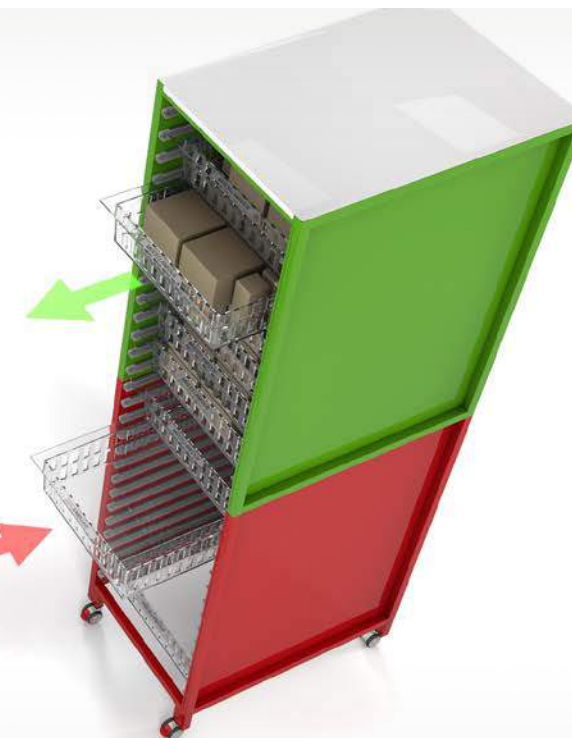

HTM71 trays (Health Technical Memorandum 71)

Published by the NHS, the HTM71 standard is a consistent sized storage solution for trays, baskets and cupboards which all accept these standardised 600x400mm trays.

Create unparalleled speed and organisation when re-stocking carts

- Empty tray out and put into the red area
- A new, fully stocked tray pulled from the green area and put into the iWOW®
- Back-room staff then stock the empty trays and rotate into the green area of the tall storage unit.

iWOW® DUO

ELECTRIC LIFT

A dual-use mobile workstation offering the flexibility of a removable tablet PC that can be docked into the iWOW® Duo whilst powered up and in use, enabling the user to continue working using the main monitor, keyboard and mouse.

Programmable electric lift and a lockable tablet housing is standard equipment on the iWOW® Duo.

PRODUCT CODE iWOW® DUO

The iWOW® Duo is our latest model in the range and really does offer flexible mobile computing. It's powerful removable tablet PC which runs a full enterprise version of Windows® 10, enables the user to take work away whilst on breaks and return and continue without interruption. The tablet can be left on the cart without fear of it going missing due to the lockable clamp housing. Also featuring the popular pull-out negative tilt keyboard shelf. All other components share the same high quality and durability as our other iWOW® models in the range.

ANTI-TILT BASE & PREMIUM CASTORS

Low centre of gravity base and long-life triple bearing castors

iWOW® DUO - TABLET PC DOCK / WORKSTATION

iWOW-DUO by FREEWAY Med-Tech

Experience zero screen downtime when docking the tablet!

As the tablet is docked into the Duo's security clamp, the tablet's screen is immediately switched off and the cart's main 24in medical monitor becomes live. This hot-swappable process means whatever application you were using on the tablet, stays open and is shown on the main monitor without delay.

Tablet docked:
main screen switches on.

Standard equipment on iWOW® Duo, all height adjustment is handled by a programmable electric lever.

MEDICAL MONITOR

BATTERY POWERED / 24IN

*PC not included

The Freeway Med-Tech battery powered monitor will power a Dell MFF PC and/or peripheral devices!

No need for large expensive 'car battery' style power supplies.

3 x DC outs - 12, 15 & 19V

The 3 different output voltages give flexibility to power up various popular add-on devices.

Example opposite shows use of the 12 & 19V DC outputs.

An important peripheral

No need to dock and separately charge this mobile label printer: It is kept topped up all day via the monitor's battery packs.

A full speed workstation

When our MT700 Monitor is used on a mobile workstation, all the power that is required to operate a MFF PC comes direct from the Monitor's DC outs!

But there's more....

Our unique industry-leading technology enables the PC CPU to run at 100% speed!

No throttling back the CPU because it's running on battery power.

MAX SPEED

100% PROCESSING POWER

Savings over its lifetime >

See overleaf why the MT700 Monitor is so economical to own over the long run.

The MT700 Monitor offers low 'cost to entry' for mobile go-anywhere workstations as well as a lower lifecycle cost*.

Already have the PC hardware?

By utilising an existing and suitable Dell MFF PC, the MT700 immediately offers mobile computing together with the benefit of being able to update the PC at a later date relatively inexpensively compared with an AIO system!

*Compared with all-in-one monitor/PCs and/or mobile workstations using large dedicated battery systems.

£££

No dedicated expensive battery packs

£

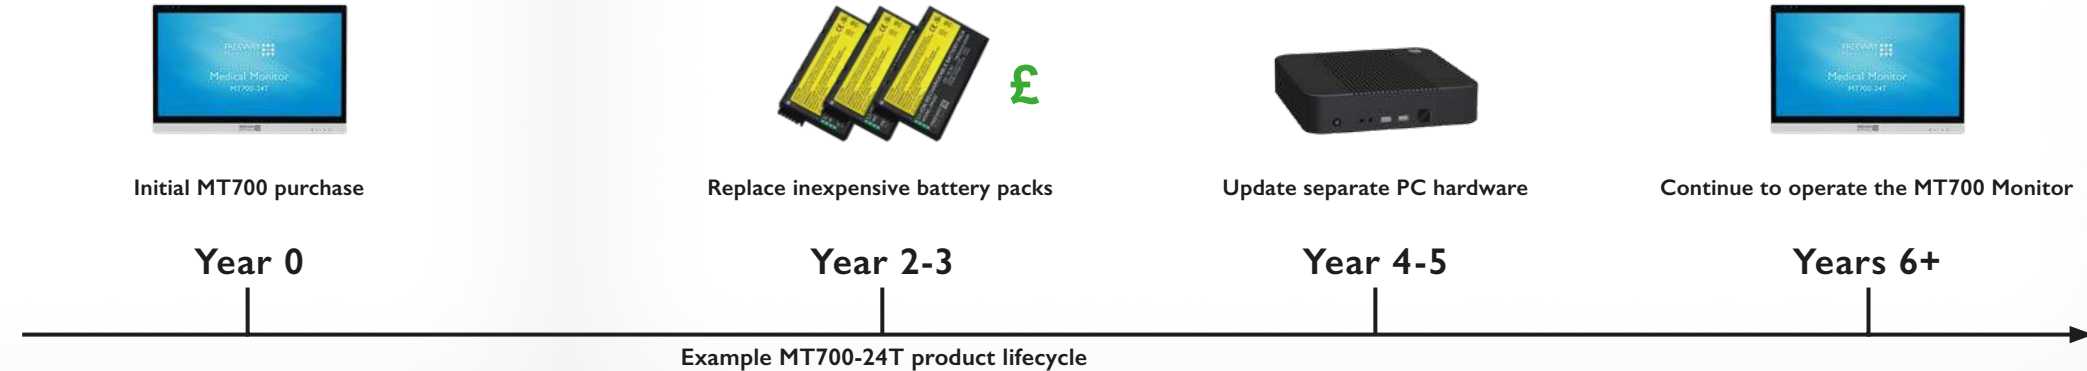

Replace inexpensive battery packs

Update separate PC hardware

Continue to operate the MT700 Monitor

Note - All batteries have a performance lifespan

This is why we utilise the highest quality lithium cells from a brand leader and package them up into small individual 90Wh battery packs. The replacement and servicing cost for these smaller units is much lower than older large dedicated battery setups.

Battery status. Constantly visible.

The Freeway Med-Tech MT500-24T (AIO) and the MT700-24T (Monitor) products feature an intuitive LED battery health indicator system that is always visible at the top of the panel.

Simply by glancing at the top left of the screen, the user can quickly see if the batteries are; fully charged, partly charged or are in need of immediate charging. The same indicators will also tell the user when the unit is plugged in and charging.

See the images opposite for the indication of each stage.

The on-screen menu

So, what do the battery status LEDs mean?

A blinking blue indicator...
This means the corresponding battery is charging.

A solid blue indicator...
This means the corresponding battery is charged 25% and above. No need to worry about charging in the near term.

A solid orange indicator...
This means the corresponding battery is charged between 24-10%. The user should be aware that the pack will need charging soon.

A blinking orange indicator...
This means the corresponding battery is charged 9% or less. The user should swap out the battery or plug the iVOW into a mains socket (if applicable).

Exact percentages
can be seen by entering the menu using the monitor's function buttons.

RELATED PRODUCT

IS IT REALLY A TABLET?

Time to re-think...

Most assume that a tablet is an add-on, an extra, but not a replacement for a laptop or desktop PC. Well, think again.

The MT300-13T is as powerful as the latest laptops and when combined with the desktop cradle, a match for most standalone PCs!

- Powerful 11th gen Intel® Core i processors
- The latest Intel® on-chip graphics - iRIS Xe
- Comprehensive I/O
- Runs as a dual or an extended screen setup when mounted in the optional desktop cradle

The portability of a tablet, the power of the latest laptop technology!

A tablet which is as comfortable as a desktop PC

Benefit from a large screen and extended keyboard when utilising the tablet desktop cradle. It makes the hours typing up notes at the end of the day, an easy affair!

Optional desktop cradle

*See pages 146/7 for more detailed information on the desktop tablet cradle.

EASY SCANNING

Barcode scanning direct from the tablet!

With the in-built 2D barcode scanner*, the workflow is streamlined by not needing a separate scanner peripheral.

Less cabling and equipment.
More speed and efficiency.

*Scanner must be specified at time of ordering the tablet.

**Login as quick as paying for
your morning coffee.**

It's just a simple tap*

Clinicians simply tap their card or badge to the RFID reader and instantly gain access to the systems they need. The temptation for staff to have to write down sensitive passwords in order to remember them, is therefore removed by default.

*RFID card reader must be specified at time of ordering the tablet.

MT300-13T - i5 PROCESSOR - STORAGE AND MEMORY CHOICE

Choose your performance spec based around the powerful 11th generation Intel® i5 Core™ central processing unit.

MT202 - LITHIUM-ION BATTERY PACK

TECHNICAL SPECIFICATIONS

Item	General Parameter	Remark
Description	Freeway Med-Tech Li-ion rechargeable battery MT202 DC10.9V 7800mAh - 85Wh	353P Assembly
Cell Model	Samsung SDI 18650	
Typical Capacity	7800mAh	
Typical Voltage	10.8V	
End of Charge Voltage	12.6V	
Charge Current	0.2C	
Charging time	4.25 hours in monitor from 10% - 90%	Faster off-cart charging available using our external charger
End discharge Voltage	8.4V	
Max continuous charge	3.9A	
Maximum continuous Discharging Current	10A	
Over-discharge Voltage Protection cell	2.8V	
Over-Current Discharge Protection	13-16A	
Short circuit protection	With protection	
Dimension	148.4x88.8x19.4mm	
Weight	435g	
Operating Temperature Range	Charge 0~45C, Discharge 20~60C	

MT202 Batteries shown in a powered monitor MT700-24T (uses up to 3 packs).

SAMSUNG

High quality components

Samsung SDI 18650 cells are used within our battery packs.

On-battery status LEDs

Clear at-a-glance visual of battery health via four LEDs.

- 4 LEDs / 75-100% charged
- 3 LEDs / 50-75% charged
- 2 LEDs / 25-50% charged
- 1 LEDs / 0-25% charged

MT500-24T/22T

MT700-24T

PRODUCT CODE
MT202 ACC-001-596 6-Bay Smart Charger

The MT202 6-Bay Smart Charger Kit charges the hot-swappable MT202 batteries for the MT700-24T, and MT500-24T series Medical Monitors / AIOs. The Kit includes one battery cradle, an AC-DC adapter, and a power cord.

The battery cradle features a DC-input jack, six battery slots, and six LEDs for power and charging indicators. Connect the AC-DC adapter cable to the DC-input jack and then insert the battery packs in the correct direction into each slot for charging.

After inserting the battery pack in the slot, the charging LED lights up (orange) if the battery pack is being recharged. When charging is complete or if the battery pack is already fully charged, the LED will show solid blue.

MT101 - FULLY WATERPROOF BACKLIT KEYBOARD

RELATED PRODUCTS *(available separately)*

| 40 iWOW® - ACCESSORIES

MT101 - FULLY WATERPROOF BACKLIT KEYBOARD

Fully waterproof

Not just water resistant or splash proof, this keyboard can withstand being fully immersed in water! This makes cleaning the surface extremely easy and thorough.

*See pages 154/55 for detailed information on cleaning chemicals and procedures.

Backlit keys for nightwork

All keys and status icons are backlit with an adjustable blue light that can be switched on/off as required. It makes working in reduced lighting much easier and more error-free.

Soft silicone encased keys

Our beautifully tactile soft silicone coating not only ensures zero liquid enters the electronics inside, but it also extremely quiet and comfortable to type on.

TECHNICAL SPECIFICATIONS

Feature	General comment
Connection	Wired
Interface	USB
Dimensions	10x380x130mm (HxWxD)
Weight	720g
Cable Length	180cm
Number of keys	110
Platform	Windows, Mac and Linux
Protection rating	IP68 (fully tested to resist dust and dirt and fully submersed in water to a depth of 1.5m for 30mins)
Lockable	Yes (5-second press to lock/unlock)
Compliant standards	CE / FCC / RoHS / IP68
Backlight	Yes - blue colour, adjustable brightness, on/off
Warranty	36 months
Operating temperature	-30°C ~ +70°C

*Specifications subject to change without notice.

Cleaning Lock Key

Holding this key in for 5 seconds disables all key inputs until it is pressed again. Great for cleaning whilst the keyboard is still plugged in!

Backlit keys on/off

Toggle the keyboard back-light with a simple key switch. The rubber encasing ensures the unit stays waterproof regardless of the keys' up/down state.

Spillages

Accidental spillages can easily be rinsed off with clean water. Even whilst the keyboard is plugged-in!

MT105 - FULLY WATERPROOF LASER MOUSE

RELATED PRODUCTS *(available separately)*

PRODUCT CODE
MT105-W Waterproof IP68 easy-clean laser mouse

The MT105 IP68 Laser Mouse is fully waterproof and designed for clinical use as it can be cleaned easily, using popular hospital chemicals. It's sealed to the highest IP68 standards in silicone to withstand frequent disinfection and offers Freeway Med-Tech's highest infection control compliance for a mouse. We are proud of the design and is a result of hundreds of hours of testing in NHS environments, with power needs specially customised to work with our MT700 & MT500 Powered Medical displays. Ideally suited in ICU, Theatres or any area where the risk of contamination is high, and cleaning is constant, requiring a rugged medical mouse.

DIMENSIONS
Height = 42mm Width = 115mm Depth = 68mm

PRODUCT ELEVATIONS

KEY FEATURES

- IP68 Rating – the mouse is completely water tight and so is protected against complete, continuous immersion in water.
- Designed to withstand water, alcohol and hospital disinfectants
- Stylish design and comfortable shape to suit left or right-handed users
- Scrolling touchpad in the middle of the mouse

MT105 - FULLY WATERPROOF LASER MOUSE

TECHNICAL SPECIFICATIONS

Feature	General comment
Connection	Wired
Interface	USB, PS/2
Dimensions	42x115x68 (HxWxD)
Weight	176g
Cable Length	180cm
DPI (resolution)	1000
Tracking Method	Laser
Hand Orientation	Left or Right
Platform	Windows, Mac and Linux
Protection rating	IP68 (fully tested to resist dust and dirt and can fully submersed in water to a depth of 1.5m for 30mins)
Compliant standards	CE / FCC / RoHS / IP68
Warranty	12 months
Operating temperature	0°C ~ 55°C

*Specifications subject to change without notice.

Sealed operation

Both mouse buttons and the scroll wheel are completely sealed underneath the soft waterproof coating leaving no traps for dirt or water ingress.

Fully submersible

Easy cleaning is achieved by wiping the surface over with alcohol wipes. But, if a deep clean is required, then the unit can be submersed in water or cleaner if necessary.

Fully waterproof

The mouse can be fully immersed in water or disinfectant to ensure thorough cleaning.

*See pages 154/55 for detailed information on cleaning chemicals and procedures.

Soft silicone encasing

Our beautifully tactile soft rubber coating not only ensures zero liquid enters the electronics inside, but it also extremely comfortable to hold and use.

MT300 - MAGNETIC BACK-LIT TABLET KEYBOARD

RELATED PRODUCTS *(available separately)*

MT300-I3T

PRODUCT CODE
MT300 Magnetic back-lit tablet keyboard

This optional slim detachable keyboard for our powerful MT300-I3T tablet, allows the user to type more freely and quickly than if using just the tablet's touch screen alone. Better still, if paired with the tablet desktop cradle and a large separate monitor, a true 'desktop' PC experience can be achieved. The keyboard's bright back-lit keys make using it in dimly-lit or late-night ward environments, a much easier task compared with a standard keyboard.

Other great features are the magnetic hinge which magically grip the tablet and helps to locate the electronic contacts ensuring an instant connection - no need for a potentially troublesome bluetooth or wireless 'pairing'. Plus, when the keyboard is in the closed position, it completely covers and protects the tablet's advanced capacitive touch screen!

DIMENSIONS
Height = **217mm** Width = **319mm** Depth = **9mm**

PRODUCT ELEVATIONS

KEY FEATURES

- Bright back-lit QWERTY keyboard
- Physical electronic (instant) connection with tablet
- Magnetic hinge grips tablet's connecting edge
- Ultra slim design

MT300 - MAGNETIC BACK-LIT TABLET KEYBOARD

TECHNICAL SPECIFICATIONS

I/O Ports	
Magnetic hinge connector	A physical connection for all data and power
Mechanical and Environmental	
Dimensions (H x W x D)	217 x 319 x 9 mm (exc. hinge connector)
Weight	0.6kg

*Specifications subject to change without notice.

Magnetically secured. Physically connected.

The removable keyboard is attached to the MT300 tablet via magnets within the hinge connector, also where the electronic contacts are housed. These gold contacts make a physical connection thereby ensuring the keyboard is 'live' as soon as they touch. No need to wait for pairing and connection as on bluetooth devices. No separate battery or power source is required to use the keyboard.

Easily attach.
Simply move the lower edge of the tablet towards the connector and it will magnetically 'grab' the bar into position.

Flexible.
The silicone interconnect allows the keyboard to move independently of the tablet and effortlessly close.

Magically held closed.
Strategically placed powerful magnetics hold the keyboard against the tablet when not in use.

A screen protector too.
When closed, by default the keyboard offers complete protection for the tablet's screen!

MT-ACC-00872HMDA- TABLET DESKTOP CRADLE

RELATED PRODUCTS *(available separately)*

MT300-I3T

TABLET-TO-DESKTOP SETUP

PRODUCT CODE
MT-ACC-00872HMDA Tablet desktop cradle

Quickly convert the MT300-I3T tablet PC into a desktop PC with this optional desktop cradle. An aesthetically designed outer casing effortlessly holds our tablet and keeps it sturdy and secured. The tablet is always charging whilst in the cradle and with it's expansive I/O, connectivity to screens, keyboards, printers and many other peripherals is never a problem. A high grip and weighted underside keep the cradle from being accidentally moved or knocked over. Extra USB ports on both sides of the cradle make plugging-in the odd storage device or phone charger a swift experience without the need to see behind the unit.

DIMENSIONS
Height = **50mm** Width = **182mm** Depth = **150mm**

PRODUCT ELEVATIONS

KEY FEATURES

- Great connectivity including accessible side USB ports
- RJ45 Ethernet socket allows reliable high speed network access when tablet docked
- Tablet is always charging whilst docked
- Weighted high-grip safety base

MT-ACC-00872HMDA- TABLET DESKTOP CRADLE

TECHNICAL SPECIFICATIONS

I/O Ports	
USB	x4 USB 2.0 (2 on rear panel, 2 on sides)
HDMI	x1 (on rear panel)
Ethernet (RJ45)	x1 10/100/1000 Gigabit port (on rear panel)
DC-in	x1
Mechanical and Environmental	
Dimensions (H x W x D)	50 x 182 x 150mm
Weight	682g

*Specifications subject to change without notice.

Accessible USB

Both sides of the desktop cradle feature USB ports for peripherals that maybe aren't always plugged in.

Secure weighted base

There's no accidentally knocking the cradle over or off a desk with it's high-grip weighted underside.

Ample connectivity options*

With a plentiful supply of ports on both the rear and sides of the cradle, getting connected with peripherals and devices is never a problem.

*See table opposite

Comprehensive I/O

The cradle features plenty of ports on both the rear and sides of the unit.

Note the power supply unit does not come with the cradle as standard. The tablet's PSU can be used or another one can be purchased separately.

THE FREEWAY EASY ROLL-OUT

From pallet to switching on, in under 5 minutes.

We pride ourselves in this unique delivery service, where an iWOW® can be unboxed and commissioned in less time than it takes to make a cup of tea!

Our iWOW®s come pre-built, pre-cabled and with all IT accessories pre-installed where applicable. There's no need for the hospital's in-house IT or engineers to setup any equipment before installing their software and licenses.

Furthermore, we use around 75% less packaging than other manufacturers and take all of what is used, away with us upon completion of the 'easy roll-out'.

Protected ✓

All iWOWs are delivered by our own transport and decanted by our own staff. This ensures a seamless process between our factory and the customer which leads to less damage and/or delays.

Pre-built ✓

iWOWs arrive fully built and with only minor elements of protective packaging in place for transit.

Pre-cabled ✓

All necessary cabling is installed at the factory leaving no room for error on-site.

It may seem like a trivial element, but anecdotally, this really does save time and costly errors compared with it being done on-site when often being rushed.

IT Pre-installed ✓

All accessory equipment can be pre-installed ready to go ensuring commissioning the iWOW® is a very quick process.

Less packaging ✓ More recycling ✓

We strive to be greener and forward-thinking regards our packaging, which is why we use much less than other manufacturers with similar products. We also take away and re-use, where possible, the protective transit packaging.

Dedicated transport ✓

The customer can always be safe in the knowledge that their new equipment will arrive undamaged.

PRODUCT CLEANING AND USE OF

How often can I clean my iWOW®?

You can clean your medical grade cart and Monitor as often as required. All health care institutions will have a recommended minimum frequency for routine cleaning of various items within their facility. This may be weekly, daily or after each use depending on the risk

involved. Please refer to the table opposite for all safe-use chemicals.

Cleaning the Freeway Med-Tech Medical Grade Monitors and AIO PCs for better infection control

Step 1. Freeway Med-Tech recommend the use of healthcare disposable alcohol based anti-bacterial wipes only on the electrical equipment (approx. 70% alcohol) – such as commonly used Clinell Green Wipes.

Step 2. It is recommended wiping from the front of the screen first in a top to bottom motion and then finish across the bottom (the front panel is IP65 Rated). This methodology is designed to minimises the amount of streaking on the screen and reduce excess moisture collecting on the lower front screen bezel, reducing the risk of moisture entering via the lower I/O, remembering to clean the lower OSD keys in the lower right hand corner. After the front Screen has been cleaned, dispose of this wipe.

Step 3. With a fresh Wipe, clean the rear of the AIO PC (the rear panel is IPX2 rated). To clean the screen of AIO PC for general house keeping - use either a microfibre cloth with an alcohol based cleaning spray (approx. 70% alcohol) or disposable alcohol based cloth.

All monitor/AIO front panels are IP65 Rated

INDUSTRY CHEMICALS

Suitable Cleaning Chemicals

Given the vast range of cleaning products on the market, it is not possible to list all acceptable brands. We can however, confirm that our products are compatible with cleaning products containing the following chemicals or are from popular cleaning brands. Should you require confirmation of suitable products that are not listed, please contact us with the relevant product data sheet and we will confirm suitability with our in-house specialist.

Cleaner	Brand
Viraguard®	Veridien
Sani-Cloth® HB	PDI
Sani-Cloth® PLUS	PDI
Super Sani-Cloth®	PDI
CaviWipes™	Metrex
Super HDQ®L 10	Spartan
Cloro-Wipe Towelette	Surgipath
Healthcare Hydrogen Peroxide Wipes	Clorox Healthcare®
Virex®	Johnson
70% Isopropyl Alcohol	Multiple suppliers
Alcohol Prep Pads	PDI, others

Suitable generic chemicals:

- Alcohol (Ethyl or Isopropyl) Solutions*
- Alcohol Wipes (Ethyl or Isopropyl)*
- Hydrogen Peroxide Solutions*

Cleaning procedure for nylon modified polyester coated surfaces:

- Painted surfaces should be cleaned using a soft damp non abrasive cloth and polished dry
- Continual exposure to wet conditions is likely to result in rusting/or the paint lifting.
ALWAYS DRY THE SURFACE AFTER CLEANING
- Continual use of cleaning products may result in a dulling of the surface.
- DO NOT use solvents, bleach, abrasives, synthetic detergents, wax polishes or aerosol sprays unless otherwise listed in the above list.

*Solutions must ALWAYS be diluted in accordance the with manufacturer's instructions for use on medical products/furniture.

*The application of the cleaning solution MUST be in accordance the with manufacturer's instructions for use on medical products/furniture.
